2.5. THE HIGH AVAILABILITY ADD-ON	387
2.6. THE RESILIENT STORAGE ADD-ON	393
APPENDIX A. REVISION HISTORY	400

MAKING OPEN SOURCE MORE INCLUSIVE

Red Hat is committed to replacing problematic language in our code, documentation, and web properties. We are beginning with these four terms: master, slave, blacklist, and whitelist. Because of the enormity of this endeavor, these changes will be implemented gradually over several upcoming releases. For more details, see [our CTO Chris Wright's message](#).

PROVIDING FEEDBACK ON RED HAT DOCUMENTATION

We appreciate your input on our documentation. Please let us know how we could make it better. To do so:

- For simple comments on specific passages, make sure you are viewing the documentation in the Multi-page HTML format. Highlight the part of text that you want to comment on. Then, click the **Add Feedback** pop-up that appears below the highlighted text, and follow the displayed instructions.
- For submitting more complex feedback, create a Bugzilla ticket:
 1. Go to the [Bugzilla](#) website.
 2. As the Component, use **Documentation**.
 3. Fill in the **Description** field with your suggestion for improvement. Include a link to the relevant part(s) of documentation.
 4. Click **Submit Bug**.

PREFACE

The Package manifest document provides a package listing for Red Hat Enterprise Linux 9.0.

Capabilities and limits of RHEL 9 as compared to other versions of the system are available in the Knowledgebase article [Red Hat Enterprise Linux technology capabilities and limits](#) .

Information regarding the RHEL life cycle is provided in the [Red Hat Enterprise Linux Life Cycle](#) document.

Detailed changes in each minor release of RHEL are documented in the [Release notes](#).

Changes to packages between RHEL 8 and RHEL 9, as well as changes between minor releases of RHEL 9, are listed in [Considerations in adopting RHEL 9](#) .

Application compatibility levels are explained in the [Red Hat Enterprise Linux 9: Application Compatibility Guide](#) document.

CHAPTER 1. RED HAT ENTERPRISE LINUX 9 CONTENT

1.1. REPOSITORIES

Content in Red Hat Enterprise Linux 9 is made available through the following content repositories:

- [BaseOS](#)
- [AppStream](#)
- [CodeReady Linux Builder](#)
- [Supplementary](#)

In addition, specific content is available through the Red Hat Enterprise Linux Add-on repositories:

- [High Availability](#)
- [Resilient Storage](#)

1.2. TYPES OF CONTENT

There are two primary types of Red Hat Enterprise Linux 9 content.

1.2.1. Traditional content

Traditional content is released as RPMs and is, unless specified otherwise, supported for the life of the release in accordance with the [Red Hat Enterprise Linux Life Cycle](#).

1.2.2. Application Streams

Certain user space components distributed in the AppStream repository are Application Streams. Application Streams are delivered on a cadence that is suitable for each package, which makes the distribution diversified. Application Streams offer multiple versions of a single package for installation within RHEL 9, which is an improvement over previous methods of making multiple versions of packages available. RHEL 9 also consolidates previous distribution channels to a single place.

Depending on the needs of the individual Application Stream, packaging for these components is implemented in a number of forms:

- RPMs
- Modules
- Software Collections.

For detailed information on the length of Application Streams support, see the [Red Hat Enterprise Linux Application Streams Life Cycle](#). For information about the other components or packages in the AppStream repository, see the [Scope of Coverage Details](#) document.

CHAPTER 2. REPOSITORIES

2.1. THE BASEOS REPOSITORY

Content in the *BaseOS* repository is intended to provide a core set of the underlying OS functionality that provides the foundation for all installations. This content is available in the RPM format and is subject to support terms similar to those in previous releases of Red Hat Enterprise Linux. For more information, see the [Scope of Coverage Details](#) document.

The following table lists all the packages in the BaseOS repository along with their license and [application compatibility level](#).

Package	License	Application Compatibility Level	RHEL 9 Minor Release Version
accel-config	GPLv2 and LGPLv2+ and MIT and CC0	4	9.0
accel-config-libs	LGPLv2+ and MIT and CC0	4	9.0
acl	GPLv2+	2	9.0
acpica-tools	GPLv2	2	9.0

2.2. THE APPSTREAM REPOSITORY

Content in the *AppStream* repository includes additional user space applications, runtime languages, and databases in support of the varied workloads and use cases.

The following table lists all the packages in the AppStream repository along with their license and [application compatibility level](#). For a list of available modules and streams, see [Section 2.2.1, “AppStream modules”](#).

Package	License	Application Compatibility Level	RHEL 9 Minor Release Version
389-ds-base	GPLv3+ and ASL 2.0	2	9.0
389-ds-base-libs	GPLv3+ and ASL 2.0	2	9.0
a52dec	GPLv2	2	9.0
aajohan-comfortaa-fonts	OFL	2	9.0

2.2.1. AppStream modules

The following table lists packages in the AppStream repository by module and stream. Note that not all packages in the AppStream repository are distributed within a module. For all packages in the AppStream repository, see [Section 2.2, “The AppStream repository”](#).

Module	Stream	Packages
--------	--------	----------

2.3. THE CODEREADY LINUX BUILDER REPOSITORY

The *CodeReady Linux Builder* repository contains additional packages for use by developers. This repository is available with all Red Hat Enterprise Linux subscriptions but does not need to be enabled on your runtime deployments. Packages included in the CodeReady Linux Builder repository are unsupported. For more information, see [How to enable and make use of content within CodeReady Linux Builder](#).

The following table lists all the packages in the CodeReady Linux Builder repository along with their license.

Package	License	RHEL 9 Minor Release Version
accel-config-devel	LGPLv2+	9.0
accountsservice-devel	GPLv3+	9.0
adwaita-icon-theme-devel	LGPLv3+ or CC-BY-SA	9.0

2.3.1. Modules in the CodeReady Linux Builder repository

The following table lists packages in the CodeReady Linux Builder repository by module and stream. Note that not all packages in this repository are distributed within a module. For all packages in the CodeReady Linux Builder repository, see [Section 2.3, “The CodeReady Linux Builder repository”](#).

Module	Stream	Packages
--------	--------	----------

2.4. THE SUPPLEMENTARY REPOSITORY

The *Supplementary* repository includes proprietary-licensed packages that are not included in the open source Red Hat Enterprise Linux repositories. Software packages in the Supplementary repository are not supported, nor are the ABIs guaranteed. Issues arising from packages belonging to the Supplementary repository are not supported. For more information, see the [Support policy of the optional and supplementary channels in Red Hat Enterprise Linux](#).

The following table lists all the packages in the Supplementary repository along with their license.

Package	License	RHEL 9 Minor Release Version
zhongyi-song-fonts	Commercial	9.0

2.5. THE HIGH AVAILABILITY ADD-ON

The *High Availability* add-on provides on-demand failover services between nodes within a cluster. The add-on is available with a separate subscription. For details, see the [Support Policies for RHEL High Availability Clusters](#).

The following table lists all the packages available with the High Availability add-on along with their license and [application compatibility level](#).

Package	License	Application Compatibility Level	RHEL 9 Minor Release Version

2.6. THE RESILIENT STORAGE ADD-ON

The *Resilient Storage* add-on enables a shared storage or clustered file system to access the same storage device over a network through a pool of data that is available to each server in the group. The add-on is available with a separate subscription. For details, see the [Support Policies for RHEL Resilient Storage - Subscriptions, Support Services, and Software Access](#).

The following table lists all the packages available with the Resilient Storage add-on along with their license and [application compatibility level](#).

Package	License	Application Compatibility Level	RHEL 9 Minor Release Version

APPENDIX A. REVISION HISTORY

0.0-2

Thu Jun 23 2022, Kyle Walker (kwalker@redhat.com)

- Promote libguestfs, libnbd, and nbdkit to Application Compatibility Level 2
- Mark httpd, mariadb, perl, php, postgresql, python, and ruby as Application Compatibility Level 3. This is to denote these as Full Life Application Streams [RHEL 9 Full Life Application Streams Release Life Cycle](#) for more details.
- Mark openldap related components as Compatibility Level 4. Due to instability in the upstream component, it is necessary to reduce the compatibility level.

0.0-1

Fri May 13 2022, Kyle Walker (kwalker@redhat.com)

- Release of the Red Hat Enterprise Linux 9.0 Package manifest.
